

## WEST WEBB DOCK – STAGES 1 AND 2 CAR TERMINAL

This \$7.0 million first stage development for Strang Stevedoring Australia Pty Ltd, comprises 7.0 hectares of regraded pavement, with access roads to the wharf structures. The wharf structures comprise berthing dolphins, mooring dolphins and mid-ship and stern access bridges for loading and unloading. The wharf is designed to berth vessels up to 30,000 tonnes and 200 metres in length. Bonacci Group was responsible for the structural, civil, electrical and hydraulic engineering for this project. The second stage involved reclamation of land fill of Stage 1, to create new car park storage for cars.
