

BANORA POINT HIGH SCHOOL

Client: Department of Public Works and Services, DPWS – NSW
Architect: DPWS and Thompson Adsett
Construction: John Holland

Six stream secondary high school in Northern New South Wales, for a school population of up to 700. Stage 1 consisted of 5 x 2 storey blocks and a single level canteen and amenities building.

Bonacci Group designed all structural and civil works. Key design challenges included very high ground water table, acid sulphate soils, flood prone area, and parking/access interface with an adjoining primary school.
