

ACI STAGE 2, SOUTHERN CROSS DRIVE, MOORE PARK

Extensive one hectare site consisting of five residential apartment towers, varying in height from 8 to 17-storeys, located over an extensive raised podium, with two below ground levels of basement carpark.

The structure was designed and built as load bearing precast, with flat post-tensioned slabs.

Precast walls were designed as spanning panels across carpark aisles, to avoid heavy transfer beams at podium level.

Location:
Moore Park, New South Wales

Client:
Meriton Apartments
