

ADELAIDE STREET, BRISBANE

Meriton Apartments first development in Brisbane is a 77 level apartment building located on the river adjacent to the Boundary St Bridge. The tower extends 245m above ground with a plan width of only 19m makes this building one of the most slender buildings for its height in the entire southern hemisphere and will require a liquid tuned mass damper on the roof to reduce the accelerations of the building under wind loads to within acceptable levels. The basement extends 10 levels below Adelaide St making it one of the deepest basements ever constructed in the Brisbane CBD and will take over 9 months to excavate.

Location:
Brisbane, Queensland
